Calling ALL FUTURE ENGINEERS

Are you passionate for problem solving?

Do you enjoy Mathematics and Science?

Then the Murrumba State Secondary College Engineering Excellence Program (EEP) is for you. The EEP is an extension program in Science, Technology, Maths and Engineering. This provides students with the opportunity to experience unique specialist units in the fields of Science, Technology, Engineering and Maths.

Over the 3 Year EEP course in Junior Secondary, the units will encompass:
- Environmental Science
- Biotechnology
- Infomechatronics
- Robotics
- Design
- Mechanics

These studies will pave the way for students to move to Senior Engineering, Mathematics and Science subjects at the College with the aim to continue on in these areas at a University level.

Entry will be determined by successful completion of an entrance examination which has a fee of $50. This fee is non-refundable.

The Engineering Excellence Program will provide you with opportunities to:

Participate in an extended curriculum within Science, Maths and Engineering as well as respond to real world engineering challenges. Students will also participate in pathways leading to University courses.
