There are known issues using IE9 and IE10. If you are using one of these browser versions you can change compatibility mode so that your browser will behave the same as the recommended IE8.

To change compatibility mode:

1. Open an IE browser
2. Select Tools > Developer Tools

3. At the **Browser Mode** option select **Internet Explorer 8 Compatibility View**

4. Close the popup screen. Your browser should now perform as an IE8 browser.
