

**MURRUMBA
STATE SECONDARY
COLLEGE**

Yuka's story:

My name is Yuka. I'm an international student from Japan and was attending Tokyo Nodai III High School. Since coming to Australia, I have missed Japanese food so I often hang out with my friends and go to Japanese restaurants.

My hobby is playing the piano. I practice every day and have the opportunity to perform the piano at College events and as part of an assessment of my music class.

My agent recommended for me to go to MSSC because students and teachers in this school are nice and kind to international students and it is a good environment to learn and make new friends.

My favorite subject is music. MSSC has great equipment for music students. There are various kinds of instruments and practice rooms. My most favorite assessment topic in music class is composition, because I had never composed until I came to MSSC and I have had a lot of fun with the topic.

I have many friends at MSSC. I have nice friends in every class I take and love talking with them in classes and break time. The friends I've made at MSSC will be my treasure forever. I have many great memories with my friends and they are all enjoyable experiences.

From my experience here, I have been introduced to a lot of different cultures and respect them. MSSC has students from many countries. They teach me about their culture or language. It makes me interested and discovered a whole new world.

I am staying with a homestay family. It is the best experience for me and memorable forever. They improve my English and make me feel comfortable.

If you are choosing to study overseas, I would recommend Murrumba State Secondary College because having a great experience and meeting wonderful friends at MSSC will be the highlight in your life.
