

# MURRUMBA STATE SECONDARY COLLEGE

## Richard's story:

I am from Seoul in South Korea and I went to private school in Korea. I think the school is quite different compared to Australia schools. Korean schools are quite small and people usually study in one class.

My hobbies include skate boarding and playing computer games.

I didn't think about going any to other countries other than Australia. The main reason why I came to Australia is, I have been here when I was grade 5 and I thought it was pretty good such as better people, better education and better environment. In addition, I had a friend who lived in Australia so my mom and I thought he could help me to adapt in Australia.

There are lots of nice, friendly people in this College and they offer me lots of activities such as Rugby Union. And I think talking with people and playing rugby is very enjoyable.

I have enjoyed going to the Gold Coast, playing Rugby Union, meeting good people such as school teachers and my friends, skate boarding at different venues and attending Murrumba State Secondary College.

Sometimes I miss my parents and my cat, but I do not really miss my friends in Korea because I still talk to them on the phone. I have stayed with a homestay family, I think meeting new people and living with them is enjoyable.

When I was young, I wanted to be an artist but since I came to Australia, I want to study architecture and want to be an architect. There are many nice buildings in the city and I want to build and design some buildings In Australia.

"If you are choosing to study overseas, I would recommend Murrumba State Secondary College because they are better people and have a better education.
