

**MURRUMBA
STATE SECONDARY
COLLEGE**

Bobby's story:

I am from Nantong China Dong'an Middle School, I came to study at Murrumba in 2019.

I enjoy reading and playing basketball with my friends.

I chose to study in Queensland because I think Queensland is great. I never thought about going to another country. Queensland has a good environment, the students are kind, and the teachers are serious and responsible. The school has excellent teaching resources. Overall Murrumba State Secondary College is friendly. My Agent helped my family and me decide the school and recommended Murrumba because of the subjects offered.

I am constantly changing and becoming more confident and I'm getting more cheerful. I have learnt that no matter what difficulties you encounter, don't be afraid. Face it with a smile. The best way to dispel fear is to face it. I have found math's very hard but when I discuss math problems in class, I have many friends who will help me. I plan on keeping in touch with them.

Since I have been in Australia I have found that I love learning and I would like to be known for being cheerful amongst my friends.

I don't miss living in China because my homestay family have made me part of their family and care for me very well.

When I decided to study in Australia I had aspirations of becoming a veterinarian, and this is something I would still like to do.

If you are choosing to study overseas, I would recommend Murrumba State Secondary College because the teachers here are amiable, responsible and caring for their students. At Murrumba State Secondary College students like to study, the learning atmosphere is excellent and the campus facilities are innovative and beautiful.
